

# Are hopper clogs restricting your profit flow? **VIBCO will clear the way.**

We're the **CONCRETE** Vibrator Guys.™

## Product Application Bulletin #413 Model DC-450T 12-Volt Battery Operated Vibrator

### VIBCO'S SOLUTION

VIBCO's Model DC-450T 12 Volt Battery Operated Vibrator was mounted at the base of the delivery hopper to keep material flowing and prevent build-up. The remote control switch allows the vibrator to be activated on demand. The customer has realized much greater batch accuracy and productivity while reducing lost man-hours.

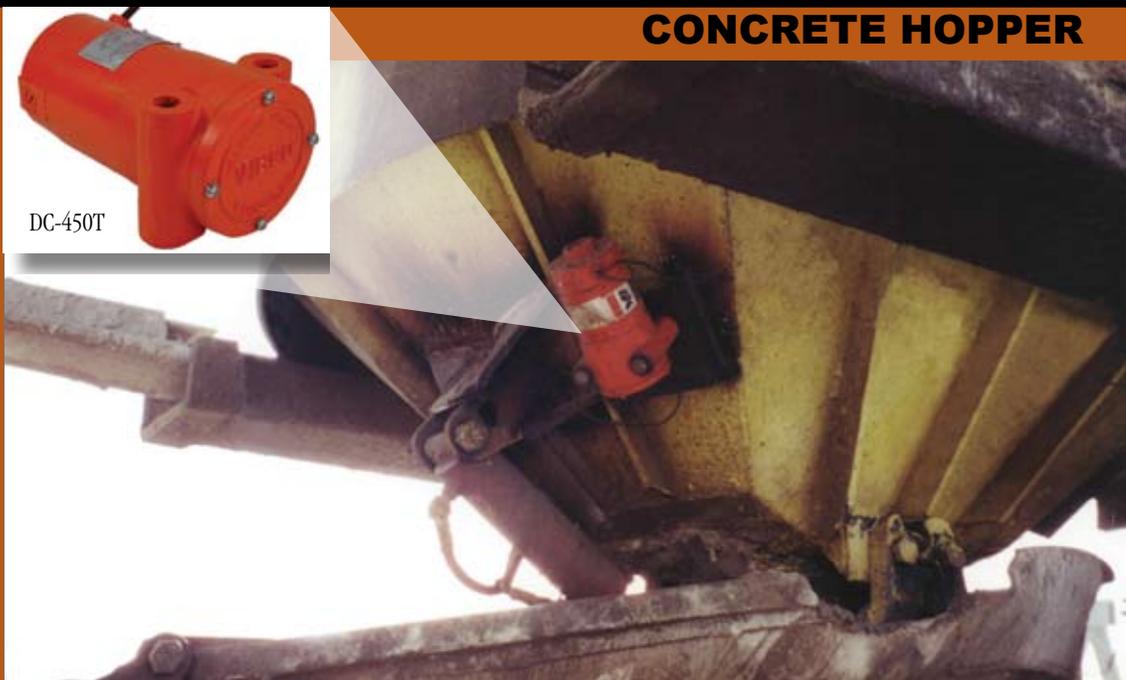

### VIBCO'S BENEFITS

After installing the VIBCO DC-450T 12 Volt Battery Operated Vibrator the customer received the following benefits:

- More accurate batches of concrete
- Eliminated production down-time caused by clogs
- No more risk of employee injury or man-hours lost while banging on the hopper with a sledge hammer

DC-450T

### CONCRETE HOPPER

“Wet concrete was building up in the delivery hopper...

The concrete would clog and then harden, eventually restricting flow through the discharge gate. The clogs caused inaccurate batches, and we had to clear them by banging on the sides of the hopper with a sledge hammer. It was a time-consuming waste of man-hours, caused production down-time, and there was a real risk that the guy doing the hammering would get hurt. We needed a better way to keep concrete flowing. VIBCO recommended the DC-450T Electric Vibrator with a remote control switch. We haven't had a single clog since installation! ”

Purchasing Manager  
Greg K., South Carolina

### Model DC-450T 12V Battery Operated Vibrator

- 7000 VPM Max Speed
- 400 lbs of force
- 12 or 24 Volt Power Available
- 75 dB on A-Scale at 1 meter

**CLICK HERE FOR ADDITIONAL TECHNICAL INFORMATION**

### ALTERNATE MODELS

- VS-380 Silent Pneumatic Turbine Vibrator with built-in muffler
- 50-2 Pneumatic Piston Vibrator
- 2P-150 Heavy Duty Electric Vibrator
